

Tree Advisory Committee

Tuesday August 13, 7:00 P.M.

Hanna Cosman Meeting Room

Agenda

Chestnut planting: 1 at oak grove, 2 at hilltop school, and there's 2 more trees that need a planting site. Bill Guenther will be contacted by Martin.

Canal St. planting- Trees aren't available at the optimal price right away. They only dig in late October, and only if there isn't a lot of rain. Trees are available sooner, but at a higher price. We discussed how to handle contribution from Mr. Parminter. Red sunset red maples were chosen, and the owner, Mr. Shapiro, is pleased with that choice.

Sidewalk update: tree choices were discussed, Martin will contact DPW with recommendations.

Fall Planting: Work with town? Paul Ethier will be contacted to determine sites and resolve funding.

Trail Work: No news, except that the West River trail is currently closed for construction.

Infestation: Bob updated the board about work he and John Orgazalek had done to advance the Community Preparedness Plan. There are new map segments from Brian Bannon that will help assess the towns tree resources. John is interviewing other prospective Antioch interns. There are new organic treatment options for EAB and HWA.

Tree Warden's report: attached.
