GENERAL:

FACILITIES:

This construction shall conform to AGS standard 3.5 "Building code requirements for reinforced concrete" latest edition.

- The contractor shall procure and install all materials according to the information shown.
- The contractor shall procure and install all materials according to the information shown.
- The contractor shall procure and install all materials according to the information shown.
- The contractor shall procure and install all materials according to the information shown.

CONCRETE:

All concrete construction shall conform to ACI standard 318 "building code requirements for reinforced concrete" latest edition.

- All concrete shall be placed in accordance with the requirements of the building code.
- All concrete shall be placed in accordance with the requirements of the building code.
- All concrete shall be placed in accordance with the requirements of the building code.
- All concrete shall be placed in accordance with the requirements of the building code.

STRUCTURAL NOTES:

The structural system shall consist of reinforced concrete beams, columns, and foundations.

- The structural system shall consist of reinforced concrete beams, columns, and foundations.
- The structural system shall consist of reinforced concrete beams, columns, and foundations.
- The structural system shall consist of reinforced concrete beams, columns, and foundations.
- The structural system shall consist of reinforced concrete beams, columns, and foundations.

DEMOLITION NOTES:

The contractor shall ensure that all existing conditions are documented prior to the start of demolition work.

- The contractor shall ensure that all existing conditions are documented prior to the start of demolition work.
- The contractor shall ensure that all existing conditions are documented prior to the start of demolition work.
- The contractor shall ensure that all existing conditions are documented prior to the start of demolition work.
- The contractor shall ensure that all existing conditions are documented prior to the start of demolition work.

FOUNDATION & SLABS:

- The foundation shall consist of cast-in-place concrete with a minimum required strength of 3,000 psi.
- The foundation shall consist of cast-in-place concrete with a minimum required strength of 3,000 psi.
- The foundation shall consist of cast-in-place concrete with a minimum required strength of 3,000 psi.
- The foundation shall consist of cast-in-place concrete with a minimum required strength of 3,000 psi.

CONSTRUCTION:

- The contractor shall review the plans and specifications prior to the start of construction.
- The contractor shall review the plans and specifications prior to the start of construction.
- The contractor shall review the plans and specifications prior to the start of construction.
- The contractor shall review the plans and specifications prior to the start of construction.

DETAILS:

- The details shall be designed to conform to all applicable codes and standards.
- The details shall be designed to conform to all applicable codes and standards.
- The details shall be designed to conform to all applicable codes and standards.
- The details shall be designed to conform to all applicable codes and standards.

REFERENCES:

- The references shall include all applicable codes, standards, and specifications.
- The references shall include all applicable codes, standards, and specifications.
- The references shall include all applicable codes, standards, and specifications.
- The references shall include all applicable codes, standards, and specifications.

NOTES:

- The notes shall include all applicable notes and specifications.
- The notes shall include all applicable notes and specifications.
- The notes shall include all applicable notes and specifications.
- The notes shall include all applicable notes and specifications.
